PROFESSIONAL SUMMARY

Business analyst with three years across enterprise ERP, CRM and HRM delivery, and a Master of Information Technology (Applied Computing) from the University of Western Australia, completed July 2026. Works at both ends of software delivery: requirements, process design and documentation with stakeholders, then Python, SQL and React when the system needs building. Delivered for Swiss and European clients from Dhaka across a five-hour timezone gap, completed a WA Department of Health placement rated Excellent by the host supervisor, and builds continuously, from a live household finance app to Flask data applications and Internet Computer dApps.

EDUCATION

Master of Information Technology (Applied Computing) | The University of Western Australia, Perth | Completed July 2026

- Key Modules: Object-Oriented Programming, Agile Web Development, Software Requirements and Design, Relational Database Management Systems, Computational Thinking with Python, Computational Data Analysis, Natural Language Processing, Business Intelligence, Data Warehousing, Cloud Computing, Introduction to Cybersecurity, Data Analysis & Decision Making, Supply Chain Analytics, Ethics and Critical Thinking, Information Technology Capstone Project, McCusker Centre for Citizenship Internship

Bachelor of Business Analytics | Deakin University, Melbourne | Conferred October 2022

- Key Modules: Business Analytics, Data Science Concepts, Business Intelligence and Data Warehousing, Data Mining and Machine Learning, Predictive Analytics, Decision Analytics, Project Management, Data and Information Management, Managing Data and Information, Business Requirements Analysis, Information Security Governance and the Cloud, Strategic Supply Chain Management, Marketing Analytics, Social Media Analytics and Data Driven Innovation, Marketing Fundamentals, Fundamentals of Finance, Professional Ethics in the Digital Age, Introductory Mathematical Methods, Introduction to Statistics and Data Analysis, Introduction to Mathematical Modelling, Fundamental Concepts of Mathematics, Artificial Intelligence for Business, Applied Business Project, Internship

WORK EXPERIENCE

NSP Approvals System Intern | WA Department of Health, Communicable Disease Control Directorate | November 2025 – December 2025 | East Perth, WA

- Replaced a legacy Microsoft Access database governing Needle and Syringe Program approvals under the Medicines and Poisons Act 2014, delivering a SharePoint Lists system with the full historical record set migrated and validated against source.
- Mapped the end-to-end approvals workflow with the Data Systems team and authored the business requirements and future-plan document adopted as the directorate's roadmap, plus a stage-2 Power Apps prototype.
- Automated applicant correspondence and certificate generation with Power Automate and mail merge, removing the transcription errors inherent to the manual process.
- Rated Excellent on all four assessed criteria by the host supervisor: applied engagement, professional responsibility, use of knowledge and skills, and engagement with organisational context.

Business Analyst | Center for Development Innovation and Practices (CDIP) | June 2023 – July 2024 | Dhaka, Bangladesh

- Ran requirements analysis across six enterprise projects, including CRM and HRM platforms for NGOs and supply-chain systems for fair-trade organisations.
- Worked with more than 320 stakeholders to gather requirements, and wrote 420+ user stories and test cases.
- Wrote the business requirements documents, system requirement specifications and UAT reports for each build.
- Cut processing time by 20% and improved resource allocation by 15% by redesigning the workflows behind them.
- Rebuilt community approval and workforce management workflows in Microsoft Access, Excel and SharePoint Lists for NGO clients.
- Migrated legacy records out of spreadsheets and Access into a structured system, and documented the process for the team that inherited it.
- Coordinated project meetings across six concurrent builds, setting agendas, taking the formal minutes, and preparing discussion papers and briefings for project sponsors.

Business Analyst | SELISE Digital Platforms | July 2021 – May 2023 | Dhaka, Bangladesh (Swiss and European clients)

- Led ERP and CRM integration work for two multinational clients (a CHF 10B security services firm and a CHF 12B rail company), improving operational efficiency by 30%.
- Coordinated a 12-person Scrum team, running sprint planning and retrospectives.
- Built 160+ clickable prototypes to settle design arguments before they reached the build.
- Wrote 1,200+ user stories and test cases, turning client requirements into work the developers could pick up without a meeting.
- Built Power BI dashboards and ran data quality validation for public and nonprofit clients.
- Worked with Swiss and European clients from Dhaka across a five-hour time difference, where decisions had to be written down rather than talked through.

Business Development Intern | The Tech Academy | March 2021 – June 2021 | Dhaka, Bangladesh

- Ran market research that identified a \$1M profit opportunity and fed a 15% revenue increase.
- Designed a customer loyalty programme projected to lift memberships by 20%.
- Ran financial modelling and data analysis in Excel, which the team used to make faster funding calls.
- Built advertising collateral and sales presentations with the team, lifting client engagement by 10%.

PROJECTS

- AI Museum WA: "A.I. Software Technology in Western Australia" (UWA capstone, team of 5, 2026): Full-stack virtual museum presenting ten major AI paradigm shifts for schools and the public; moved topic content behind a Flask and SQLAlchemy API, rebuilt the timeline engine and delivered the complete authentication system. Feature work merged through reviewed pull requests, with a 41-test pytest and Selenium suite finishing green.
- Combined Budget Tracker (personal build, live and in daily use, 2026): A Supabase household finance app with Postgres row-level security: 12 ordered SQL migrations, SQL tests asserting household isolation, and Tesseract.js payslip OCR.
- HealthWhisper (UWA team project, team of 3, April 2025 – May 2025): A Flask web app for uploading and charting personal health data; created the repository and delivered authentication, the dashboard, upload validation and the trend-score logic across nine merged pull requests.
- Amberg Technologies AG: RailTrack Measurement System (SELISE, Swiss rail technology client, December 2022 – May 2023): Real-time rail track monitoring that reached 90% accuracy in assessing track condition, with automated anomaly detection, predictive maintenance alerts and a reporting and visualisation module.
- DELTA Security AG: ERP with CRM, HRM and Project Management (SELISE, CHF 10B security services client, July 2021 – December 2022): An integrated ERP covering customer ticketing, payroll automation and project management in one system; the CRM cut response times by 40% and payroll processing by 30%.
- Lubnan Trade Consortium: HRM, Retail Operations and Supply Chain (CDIP, fair-trade consortium, September 2023 – July 2024): Three connected systems covering employee transitions and payroll, outlet and inventory management, and warehouse, resource-allocation and procurement tracking.
- Credit Exchange AG: Commission and Billing Tool (SELISE, Swiss mortgage fintech, September 2021 – January 2023): Mortgage commission calculation and payment automation with real-time commission tracking, automated invoicing and error detection.
- German Club Dhaka: Event Management and Facility Booking (CDIP engagement, November 2023 – July 2024): Member signup approvals, a payment gateway with internal wallet management, and a facility booking system.
- SATU, PIDIM Foundation and Hydrus Digital: custom HRM (CDIP, three organisations, June 2023 – July 2024): HRM implementations tailored to three organisations, covering employee management, payroll and leave tracking.
- JOTE.io: Micro-Investing Platform (client project, business analysis and project management, December 2023 – July 2024): Tokenised, pooled micro-investing from 500 Taka across fractional real estate, gold, stock portfolios, banking products and startups, with portfolio management, investment tracking and simulators.
- Hypatia AG: HRM and Recruiting Software (SELISE, recruiting platform, November 2022 – January 2023): Job matching on skills, experience and employer preferences, with automated recommendations, application tracking, interview scheduling and onboarding.
- Hawle: Fire Hydrants Portal (SELISE, municipal infrastructure, November 2022 – January 2023): Monitoring and asset management for municipal fire hydrants: a GIS map by city zone, live IoT readings for water pressure, flow rate and temperature, an alerts module and a dashboard tracking locations and battery levels.
- DKeeper: notes on the Internet Computer (bootcamp build, Motoko and React, November 2023): A Google Keep-style note-taker whose notes live in a Motoko canister; notes are written from the React front end, held in stable storage and returned by query calls.
- DBank: a decentralised bank canister (bootcamp build, Motoko on-chain state, November 2023): A bank whose balance lives inside the canister: deposit, withdraw and let the balance compound from the canister's own clock between transactions.
- DANG: a token and faucet on the Internet Computer (bootcamp build, November 2023): A custom token with an interactive front end for checking balances and transferring between accounts, plus a faucet that pays out 10,000 DANG to a signed-in principal.
- OpenD: NFT marketplace (bootcamp build, canister-per-asset design, November 2023): Mint, list, browse and buy NFTs where each minted NFT is deployed as its own canister, so ownership records live on-chain.
- To-Do List: PostgreSQL from the server down (bootcamp coursework, Node and PostgreSQL, 2023): A server-rendered to-do list backed by a real PostgreSQL database: add, edit, tick off and delete items with SQL rather than client-side state.
- Authentication and Security: six levels in one Express app (bootcamp coursework, Node, MongoDB and Passport, 2023): The bootcamp's authentication ladder in a single app: plain-text storage, encryption, MD5, bcrypt salting, Passport sessions and Google OAuth 2.0, behind one secrets board.

SKILLS AND CERTIFICATES

- Skills: Requirements gathering and elicitation, stakeholder management, business and technical documentation (BRD, SRS, UAT), Agile and Scrum delivery, data analysis and statistics, SQL and relational databases, supply chain analytics, process mapping and BPMN 2.0, Power BI and advanced Excel, business intelligence and data warehousing, data mining and machine learning, decision analytics, marketing and social media analytics, financial analysis, natural language processing, cybersecurity fundamentals, software requirements and design, meeting minutes and committee papers, executive support (diary and scheduling, travel coordination, correspondence for signature), ministerial and executive correspondence, Cabinet and board submissions, research and discussion papers, learning management system administration and compliance reporting, handling confidential and sensitive data under a formal policy, business case development, budget tracking and financial forecasting, Python, JIRA, Confluence and Azure DevOps, Figma and wireframing, Microsoft Access, SharePoint Lists, Supabase and Postgres row-level security, PostgreSQL, MySQL, Jupyter Notebook, Google Colab, Git and GitHub, HTML, CSS, JavaScript and React, object-oriented programming (Java), cloud computing (AWS and Azure), artificial intelligence for business applications, predictive analytics, R (coursework), C and C++, AI systems, retrieval-augmented generation (RAG), large language models, prompt and token optimisation, Docker, GitHub Actions, Postman and Swagger, TypeScript, Node.js, React Native, MongoDB, Linux, GitLab, VBA, Stripe, Tableau, Azure ML, Kubernetes, Terraform, GraphQL, ArcGIS, Slack, Trello, Balsamiq
- Certifications: The Complete 2023 Web Development Bootcamp, Udemy (November 2023), The Complete SQL Bootcamp: Go from Zero to Hero, Udemy (May 2023), The Practical BPMN 2.0 Master Class, Udemy (March 2022), Scrum Master Certification 2023 + Agile Scrum Certification, Udemy (December 2021), Agile Leadership and Resilient Teams, Udemy (January 2021), Detailed Guide to Building Wireframes Using Balsamiq Mockups, Udemy (January 2021), UX Strategy Fundamentals, Udemy (January 2021)
