SUMMARY

- Master of Information Technology (Applied Computing), University of Western Australia — completed July 2026 — following three years of business analysis across ERP, CRM and HRM delivery.
- Works at both ends of software delivery: requirements, process design and documentation with stakeholders; Python, Flask, React and SQL when the system needs building.
- Delivered for Swiss and European clients across a five-hour timezone gap; recent Australian experience includes a WA Department of Health placement rated Excellent on all four assessed criteria.
- Currently building AI systems — RAG pipelines and LLM applications.

EDUCATION

Master of Information Technology (Applied Computing) | The University of Western Australia | Completed July 2026

- Technical spine: Python, relational databases, natural language processing, software requirements and design, cybersecurity and agile web development.
- IT Capstone Project — Distinction (75).

Bachelor of Business Analytics | Deakin University | Conferred October 2022

- Deakin International Merit Scholarship.
- Statistics and quantitative analysis, data mining and machine learning, business intelligence and data warehousing, supply-chain analytics.

WORK EXPERIENCE

NSP Approvals System Intern | WA Department of Health, Communicable Disease Control Directorate | November – December 2025 | East Perth, WA

- Replaced a legacy Microsoft Access database governing Needle and Syringe Program approvals under the Medicines and Poisons Act 2014, delivering a SharePoint Lists system with the full historical record set migrated and validated against source.
- Mapped the approval workflow end to end and authored a business requirements and future-plan document adopted as the directorate's roadmap.
- Automated applicant correspondence and certificate generation with Power Automate and mail merge, removing manual transcription errors.
- Rated Excellent on all four assessed criteria by the host supervisor.

Business Analyst | Center for Development Innovation and Practices (CDIP) | June 2023 – July 2024 | Dhaka, Bangladesh

- Ran requirements analysis across six enterprise projects, including CRM and HRM platforms for NGOs and supply chain systems.
- Worked with 320+ stakeholders and wrote 420+ user stories and test cases; authored the BRDs, SRS documents and UAT reports for each build.
- Cut processing time by 20% and improved resource allocation by 15% by redesigning the approval workflows behind them.
- Coordinated project meetings across six concurrent builds — agendas, formal minutes, and discussion papers for project sponsors.

Business Analyst | SELISE Digital Platforms | July 2021 – May 2023 | Dhaka, Bangladesh (Swiss and European clients)

- Led ERP and CRM integration work for a CHF 10B security services group and a CHF 12B rail technology leader, improving operational efficiency by 30%.
- Coordinated a 12-member Scrum team, running sprint planning and retrospectives; designed 160+ clickable prototypes.
- Authored 1,200+ user stories and test cases, turning client requirements into buildable specifications.
- Supported Power BI dashboards and data-quality validation for public and nonprofit clients.

Business Development Intern | The Tech Academy | March – June 2021 | Dhaka, Bangladesh

- Market research identifying a \$1M profit opportunity; contributed to a 15% revenue increase through optimised operations.
- Designed a customer loyalty programme projected to lift memberships by 20%; built Excel financial models improving financial decision-making by 20%.

SELECTED PROJECTS

AI Museum WA — A.I. Software Technology in Western Australia | UWA Capstone, team of 5 | 2026

- Built the timeline engine and the complete authentication layer (hashed passwords, sessions, protected routes) for a Flask and SQLAlchemy virtual museum; feature work merged through reviewed PRs #4 and #20; the 41-test pytest and Selenium suite finished green.

Combined Budget Tracker | personal build, live | 2026

- A Supabase household finance app with Postgres row-level security: 12 ordered SQL migrations including RLS and storage policies, SQL tests asserting household isolation, and Tesseract.js payslip OCR; live and in daily use.

HealthWhisper | UWA team project, team of 3 | April – May 2025

- Flask web app for uploading personal health data (steps, sleep, mood), charting it automatically and sharing individual data types; built the authentication flows, dashboard, upload validation and trend-score logic across nine merged pull requests.

Amberg Technologies AG – RailTrack Measurement System | SELISE | December 2022 – May 2023

- Real-time rail track monitoring that reached 90% accuracy in assessing track condition, with automated anomaly detection, predictive maintenance alerts and reporting that improved decision-making efficiency by 20%.

SKILLS

- Strong: Requirements gathering and elicitation · Stakeholder management · Business and technical documentation (BRD, SRS, UAT) · Agile and Scrum · SQL and relational databases · Data analysis and statistics · Power BI · Advanced Excel · Process mapping and BPMN 2.0 · Supply-chain analytics
- Working: Python · Business intelligence · Data warehousing · Data mining and machine learning · Natural language processing · Decision analytics · Software requirements and design · Cybersecurity fundamentals · JIRA, Confluence, Azure DevOps · Figma and wireframing · Git and GitHub pull-request workflow · SuccessFactors Learning (LMS administration)
- Project or coursework exposure: Docker · GitHub Actions · Postman/Swagger · TypeScript · Node.js · React Native · MongoDB · Linux · GitLab · VBA · Stripe · Tableau · Azure ML · Kubernetes · Terraform · GraphQL
- Currently developing: AI systems · RAG pipelines · LLM applications · prompt and token optimisation

CERTIFICATIONS

- The Complete 2023 Web Development Bootcamp (Udemy, November 2023)
- The Complete SQL Bootcamp: Go from Zero to Hero (Udemy, May 2023)
- The Practical BPMN 2.0 Master Class (Udemy, March 2022)
- Scrum Master Certification 2023 + Agile Scrum Certification (Udemy, December 2021)
- Agile Leadership and Resilient Teams (Udemy, January 2021)
- Detailed Guide to Building Wireframes Using Balsamiq Mockups (Udemy, January 2021)
- UX Strategy Fundamentals (Udemy, January 2021)

LANGUAGES

- English – professional (PTE 86) · Bengali – native · Hindi/Urdu – conversational
